1. Claims 1-29 are presented for examination.
2. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 17(2) of such treaty in the English language.

or

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-3, 6-9, 11-13, 16-19, 21-22, and 25-28 are rejected under 35 U.S.C. § 102(e) as being anticipated by Boden Pub. No. 2003/0145104.

5. As to claim 1, Boden teaches the invention as claimed, including a method of forwarding data traffic in a packet-switched network, the packet-switched network further comprising a plurality of virtual networks defined thereon, comprising the steps of:

(a) receiving data traffic with a destination address (page 2, paragraph [0035]);

(b) where the destination address is a local address in the packet switched network, forwarding the data traffic using destination-based routing (page 3, paragraphs [0041, 0049]); and

(c) where the destination address is not a local address in the packet-switched network, policy filtering the data traffic and, based on the policy filtering, mapping the data traffic to one of the plurality of virtual networks (page 3, paragraphs [0041-0042, 0050]).

Art Unit: 2141

6. As to claims 2-3 and 6-9, Boden teaches one of the plurality of virtual networks defines routes for data traffic and forwards data traffic using destination-based routing; Boden also teaches policy filtering is based on source address in packet header of Internet Protocol (Figs 6-7; page 3, paragraphs [0041-0042]).

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 4-5, 10, 14-15, 20, 23-24, and 29 are rejected under 35 U.S.C. § 103 (a) as being unpatentable over Boden Pub. No. 2003/0145104, in view of Daruwalla et al. (Daruwalla) Patent No. 6,693,878.

9. As to claims 4-5, Boden teaches the invention substantially as claimed as discussed above; however, Boden, does not explicitly teach the data traffic is mapped using MultiProtocol Label Switching (MPLS).

Daruwalla teaches using Multiprotocol Label Switching (MPLS) to implement and manage VPN flows (col. 7 line 47 – col. 8 line 16).

It would have been obvious to one of ordinary skill in the Data Processing art at the time of the invention to combine the teachings of Boden and Daruwalla to map data traffic using MPLS because it would allow enterprise customers use their internal

address space across MPLS VPN network.

10. As to claims 10, Daruwalla teaches the packet-switched network comprises a hybrid fiber coaxial network (Fig 1; col. 1 lines 46-59).

11. Claims 11-29 have similar limitations as claims 1-10; therefore, they are rejected under the same rationale.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Le H. Luu whose telephone number is 571-272-3884. The examiner can normally be reached on 7:00am - 4:30pm.
